You are WELCOME to join us!

SEMINARS SUMMARISING THE PROJECT:

Latvia – 24 March 2017

Lithuania – 7 April 2017

Erasmus+

The idea of the project is to modernise the education system at the project partner schools through the preparation, testing and promotion of innovative methods and techniques of vocational training. This will be introduced by: developing a modern tool to assess the skills and professional qualifications, creating innovative teaching methods and techniques with the use of multimedia technology and ICT, developing teaching materials designed for vocational subjects and Business English, and creating innovative training session programmes, which will be tested by students of the partner schools.

Result 1 - developed by ZSEiO no 6 in Lomza - an innovative tool to assess vocational skills and qualifications with the use of online tools and mobile technologies; a Moodle platform was adapted to be used in the educational process at vocational subjects:

<http://ekonomik-lomza.org.pl>

The platform can be used at schools, but also in self-study of all the people interested in it (students and teachers, not only from partner schools). The tool is available as an application on mobile devices such as smartphones and tablets.

The main aim of the project has been divided into partial results, which are developed by individual project partners. The results are

Result 2

developed by the Latvian Partner School - innovative methods and techniques for teaching vocational subjects, supported by multimedia technologies and ICT, for the use of distance and mobile learning.

Result 3

developed by the Lithuanian Partner School - innovative materials for online study in the field of e-marketing (in English).

Result 4

developed by Perfect Project LLC - a program of three training courses in the fields of ICT, Business Ethics and Communication, as well as a collection of Business English exercises.
