

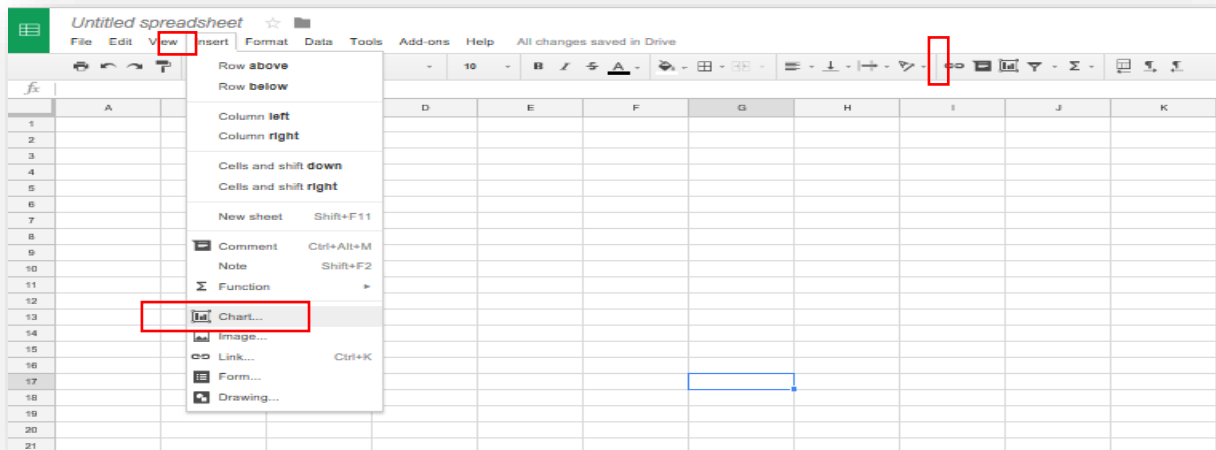

Graphical presentation of data

The advantage of a spreadsheet is the opportunity to present numerical data in graphical presentation - chart. They are linked to the data - change the content of the cells results in a corresponding change on the chart immediately.

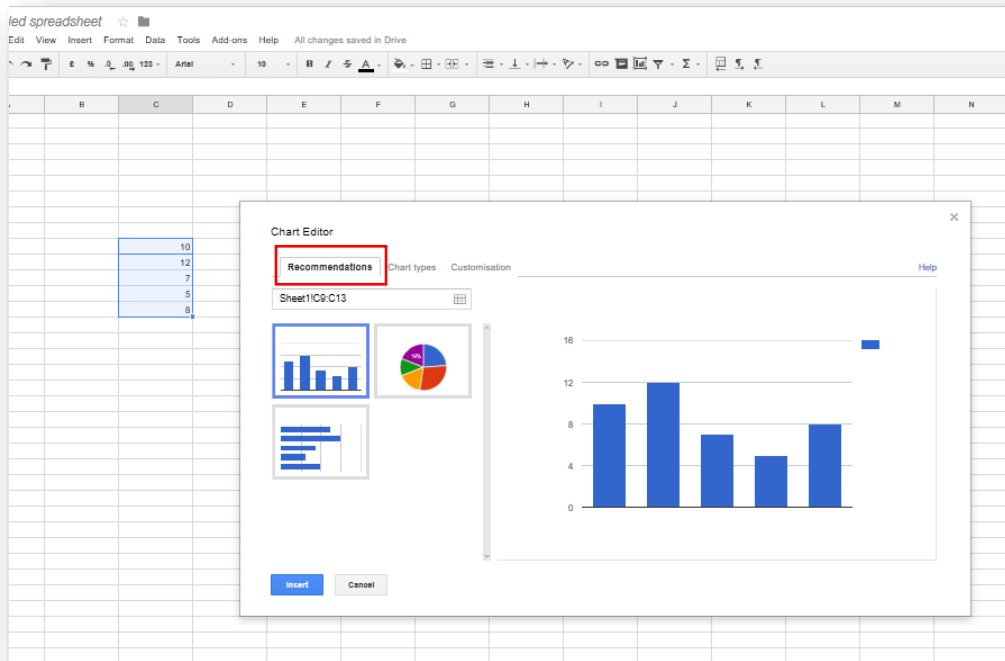

Creating charts

A tool that makes the creation of the chart easier is wizard, which can be run by the Insert chart or via the menu Insert -> Chart

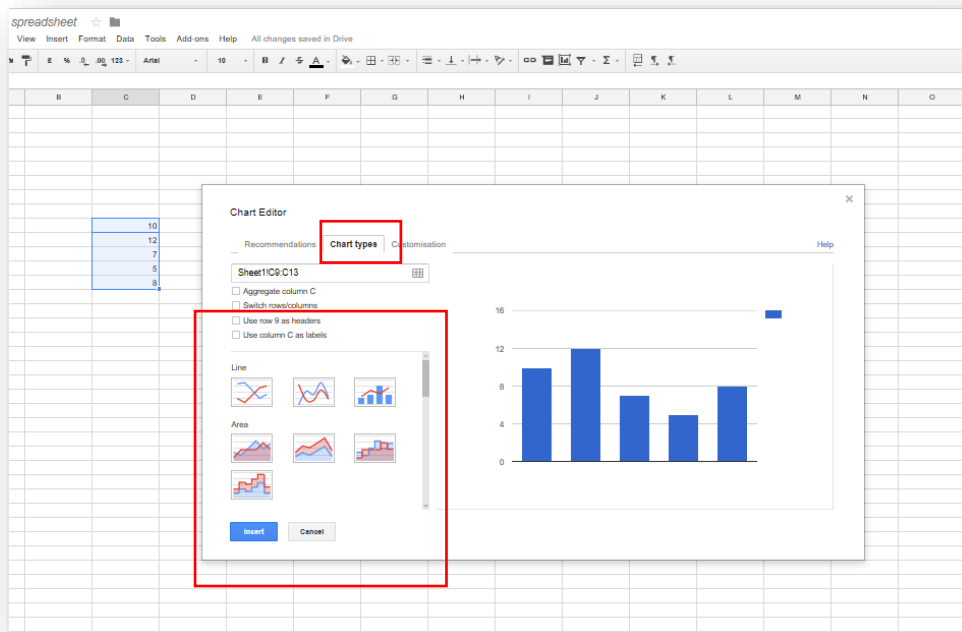

Creating a chart takes the following steps:

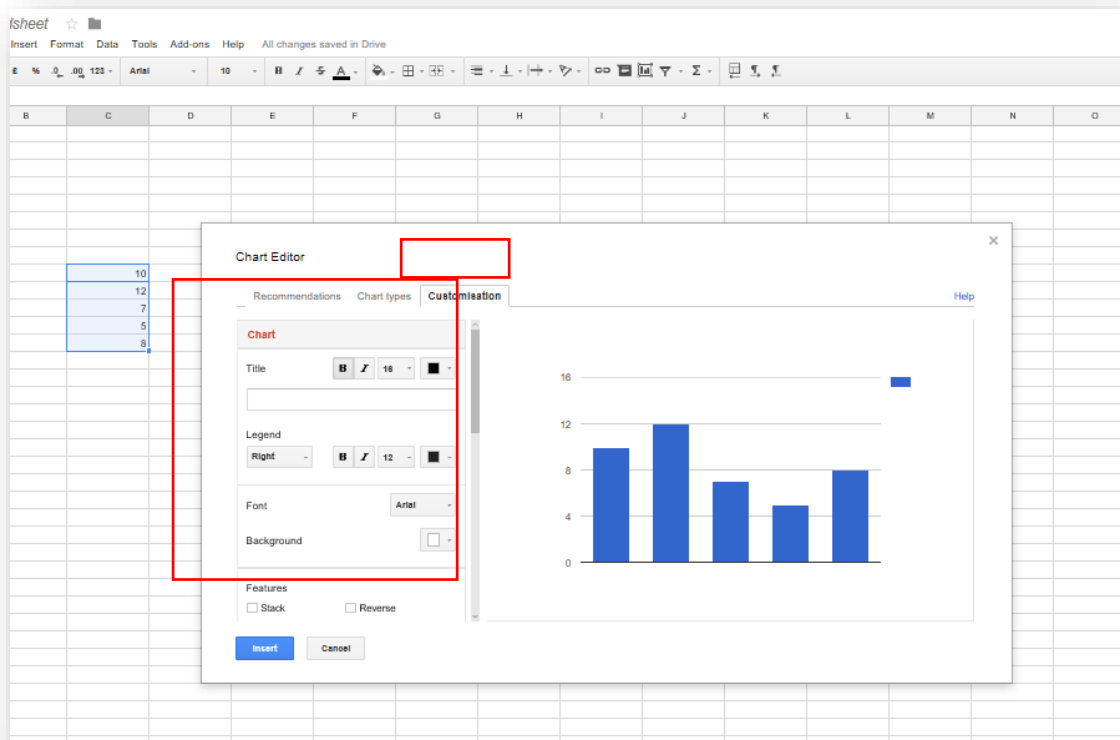

1. Enter data into a spreadsheet
2. Select the data
3. Select Insert-> Chart

4. You can change the type of chart

5. You can add the title and edit the data presented in the chart

6. When everything is ready, click Insert

7. Click the arrow in the upper right corner of the chart to return to the editing
